# Cover Letter

## Senior Data Analyst @ adjoe

Dear Hiring Manager,

I am writing to express my interest in the Senior Data Analyst position at adjoe. My background as an analytics professional, with extensive experience in mobile app growth, performance forecasting, and A/B testing, aligns directly with your focus on optimizing real-time ad auctions and user behavior. I bring a grounded approach to leveraging data for strategic decision-making, particularly in high-growth, data-intensive environments like adjoe's AdTech domain.

In my current role as Marketing Business Analyst at NeoTaste GmbH, a subscription-based mobile app operating across 51 cities, I own end-to-end marketing and growth analytics. This involves designing and implementing demand forecasting models in Snowflake and dbt to enable scenario-based budget planning and city-level growth forecasts. I also unify attribution, performance, and CRM metrics through standardized Power BI dashboards, providing leadership with clear insights for strategic decisions. My work consistently focuses on applying analytics to improve real-world marketing and operational workflows.

My analytical craftsmanship extends to robust data modeling and metric standardization. I have built and maintained scalable fact and intermediate tables to combine performance marketing, CRM, and product event data, ensuring data quality and consistency. At ecoligo and heycar, I developed custom multi-touch attribution models integrating various platforms, optimizing resource allocation and CLTV calculations. I am proficient in setting up data warehouses, implementing session-level tracking, and utilizing statistical analyses for A/B test evaluation, positioning me as a reliable expert in data-driven decision enablement.

I am confident I can bring significant value to adjoe as a Senior Data Analyst. My experience in analyzing user behavior, optimizing performance, and collaborating with data science and business teams aligns well with your needs. I look forward to discussing how my analytical expertise can contribute to shaping adjoe's bidding algorithms and driving future business success.

Sincerely,

Sreedeep Sreekanth
